Single Starts Finish the Year Flat While MLS® Sales Decline

A relatively slow month of December capped off an interesting year for the housing market in the Halifax Regional Municipality (HRM). The local economy remained stable in 2008 as employment reached record highs and unemployment reached record lows. However, higher inflation, lower wage growth and economic uncertainty contributed to fewer MLS® sales and fewer starts last year compared to 2007. Average price growth remained strong in the existing homes market. In the new homes market, a broader range of products actually brought the average new home price down from the 2007 level.

Overall starts were down by 38 per cent in HRM last month with only 109 starts recorded compared to 174 in December 2007. There were only 65 single-detached starts

compared to 130 last December which is a decline of 50 per cent. On the multiples side, there were ten apartment-style condominium units, 20 rental apartment units, and eight row units started last month compared to none in December 2007. Six semi-detached units broke ground in December compared to four in 2007.

For the year, overall starts declined by 16 per cent to reach their lowest level since 1998. The decline was due to a decrease in rental starts and condo starts. These segments of the market recorded 25 and 51 per cent declines respectively. A tight labour market coupled with economic uncertainty created delays in projects already under construction and forced some developers to postpone future projects. However, in a year that saw record levels of construction, there were 21 per cent more completions in 2008 compared to 2007. As of December, there were 1,970 units under construction in HRM compared to 2,464 in December 2007.

Single-detached starts were flat in 2008 finishing the year with 1,177 starts compared to 1,169 in 2007. After the first half of 2008, single starts in HRM were up by 21 per cent, however, they trended downward in the third and fourth quarters. The downward trend in single starts was anticipated as the new homes market had been responding to some spill over demand from the existing homes market in HRM in the first half of 2008. As demand was satisfied and tapered off, so did starts.

There were 18 per cent more new home sales in HRM in 2008 compared to 2007, however, there was also a greater mix of new homes sold in HRM last year which contributed to the average price of a new home decreasing to $329,765 compared to $332,821 in 2007. The median price in 2008 was $299,900 compared to $305,000 in 2007. The percentage share of homes priced under $250,000 was higher last year compared to 2007. Of the 1,172 new home sales in 2008, 322 (27 per cent) were priced under $250,000 compared to 254 (26 per cent) in 2007. For homes priced over $250,000 there were 850 (73 per cent) compared to 736 (74 per cent) in 2007.

The overall price decline in 2008 was significantly impacted by two submarkets in HRM. All submarkets except for Dartmouth City and Halifax County East saw an average of five per cent price growth. These two submarkets however saw new home prices fall 13.5 and 17.4 per cent respectively.

Figure 3

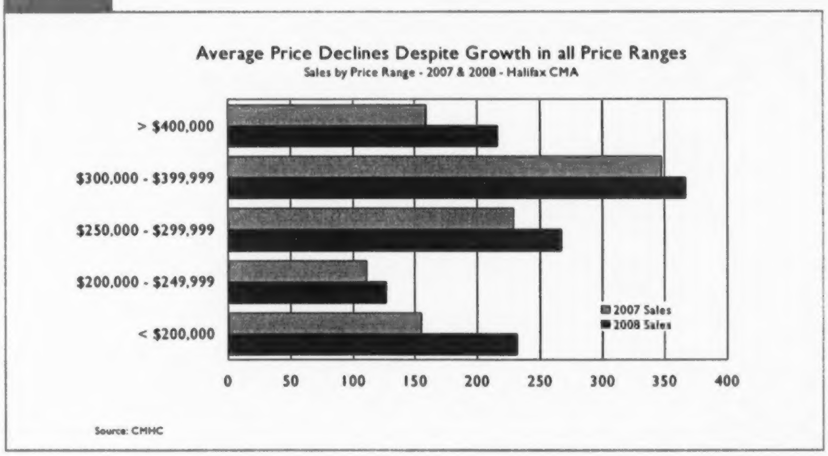

Figure 4

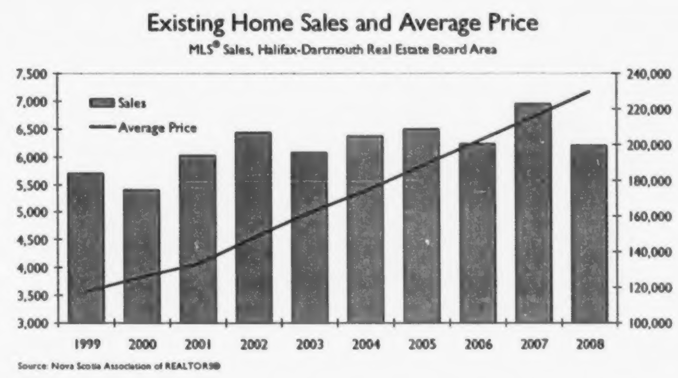

average price increased by 12 per cent in 2008 to $180,100 from $160,750 in 2007. The average price in Bedford-Hammonds Plains increased by seven per cent reaching $293,600 while the average price in Halifax City and Fall River-Beaverbank increased by 8.2 per cent to $273,580 and $251,185 respectively. Halifax County Southwest and Halifax County East recorded the smallest average price growth at 3.3 and 4.0 per cent respectively.

In the existing homes market, there were 6,205 MLS® sales in HRM last year compared to 6,945 in 2007, representing a 10.7 per cent decline. Existing home sales in HRM have been stable over the past ten years and despite the decline, sales in 2008 remained above the 10-year average of 6,188 units. Dartmouth City had the most existing home sales in 2008 with 1,669, only four per cent fewer than the 1,736 sales in 2007. MLS® sales in Halifax City declined by 11 per cent to 1,519 from 1,706 in 2007, while Bedford-Hammonds Plains, Sackville and Halifax County West also posted declines of 15.6, 13.1 and 14.1 per cent respectively. Halifax County East had the smallest decline in sales last year compared to 2008 with a decline of only 3.6 per cent while Fall River-Beaverbank recorded the highest decline, with sales falling by 22 per cent to 422 from 542 in 2007.

Another factor which characterizes the stability in HRM's existing homes market is consistent price growth. Despite the decline in sales last year, the average price of an existing home increased by 6.6 per cent in HRM to $229,916 compared to $215,668 in 2007. This price growth is consistent with the annual ten year average of 7.7 per cent. After six months of 2008, price growth eased to about five per cent due to an increase in listings and fewer sales. In the second half of the year, sales continued to decline but so did the number of new listings, which applied additional upward pressure on prices.

All submarkets in HRM experienced positive average price growth in 2008 with the highest growth occurring in Sackville where the

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "**dwelling unit**", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "**start**", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "**under construction**" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "**completion**", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "**absorbed**" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A "**Single-Detached**" dwelling (also referred to as "**Single**") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "**Semi-Detached (Double)**" dwelling (also referred to as "**Semi**") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "**Row (Townhouse)**" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "**Apartment and other**" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The "**intended market**" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "**Rural**" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada's 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at www.cmhc.ca

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274.
Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is available for free on CMHC's website. You can view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient!
